

Answer every setup enquiry fast, quote clearly and never miss a renewal.

We set up ChatGPT for Dubai business setup consultants, PRO and corporate services firms. It works from your own package price lists, free zone and mainland comparison sheets, document checklists and renewal calendar, alongside the WhatsApp and CRM your consultants already use. Consultants stay in control: AI drafts, people verify and send.

For company formation consultants, PRO and visa services firms and corporate services providers.

Prospect (WhatsApp)

Hi, I want to open an IT consulting company in Dubai, just me and maybe 1 employee later. Free zone or mainland? Cost?

Consultant · drafted by AI

Thanks for reaching out! For IT consulting with 1–2 visas, clients usually compare: (1) a free zone package with 1 visa, and (2) a mainland licence if you plan to work directly with government or onshore clients. I've prepared both options from our current price list. Shall I send the comparison? Also, will you need an office, or is a flexi-desk fine?

Does this sound like your firm?

Prospects ask the same questions in many languages, compare you with ten competitors, and expect a clear answer today.

"Free zone or mainland?"

The same comparison explained hundreds of times a month.

Quotes take too long

Every quote mixes packages, visas, office options and add-ons.

Document chasing

Passports, photos, NOCs and attestations collected one message at a time.

Renewals slip

Licence, visa and Emirates ID renewals tracked in spreadsheets.

Clients in many languages

Founders from everywhere, each needing clear instructions.

Rules change

Requirements and fees update, and old answers keep circulating.

Eight ways AI can help your business setup firm this month.

Each one is built on **your** price lists, checklists and templates, checked against current authority requirements.
